Welcome to Stuttgart, Germany's High-Tech Location

Mercedes-Benz, Porsche, Bosch and other global players helped build Stuttgart's reputation as „the automotive capital of Germany“. High-tech from Stuttgart has an excellent reputation all over the world. Stuttgart is one of Germany's most innovative and commercially successful regions – and also one of the greenest cities in Europe.

The capital of the German state of Baden-Württemberg, Stuttgart is located in the middle of vineyards and forests. Nor does nature stop at the city limits – as witnessed by the numerous parks and islands of greenery in the downtown area.

Stuttgart also has plenty to offer in terms of cultural events. The city's internationally renowned ballet and opera, its numerous small and large theaters, and the two popular musical theaters offer natives and visitors alike a large variety of cultural events.

The Division of Hand Surgery, Plastic Surgery & Aesthetic Surgery

The Division of Hand Surgery, Plastic Surgery & Aesthetic Surgery covers the entire spectrum of Hand Surgery and Plastic Reconstructive Surgery. It provides high-level care to patients from all over Germany, as well as from Stuttgart, with severe hand injuries and infections and with all kinds of chronic and degenerative diseases of the hand.

The Division offers a wide range of plastic reconstructive procedures including free flap plasty. These operations are especially suitable for patients with soft-tissue defects following injuries or infections.

Furthermore, the Division of Hand Surgery, Plastic Surgery & Aesthetic Surgery manages the Center for Aesthetic Surgery of Stuttgart Medical Center. Under the motto „Beauty & Health“, the Center offers a comprehensive spectrum of procedures in the field of Aesthetic Surgery.

Spectrum of Services (List of Selected Procedures)

Hand Surgery

- Carpal tunnel syndrome
- Dupuytren's contracture
- Wrist joint reconstruction
- Degenerative diseases of the hand
- Acute care and reoperation of patients with hand injuries
- Congenital malformations and malpositions
- Hand deformities in children

Plastic Surgery and Aesthetic Surgery

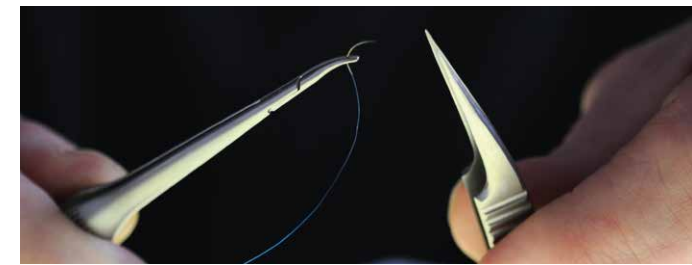

- Reconstruction of soft-tissue defects by pedicled or microvascular flaps
- Reconstruction after tumor operations and burns

Aesthetic Surgery

(Director: Dr. Alexander Tripp)

www.stuttgart-aesthetische-chirurgie.de

- Breast augmentation

- Breast reduction
- Liposuction
- Panniculectomy („skin apron“ removal)

Technical Systems and Equipment

In addition to sophisticated technical options such as intraoperative 3D imaging, the Division offers patients an impressive array of high-tech equipment for Aesthetic Surgery including:

- Surgical microscope
- Special instruments for Aesthetic Surgery
- Equipment for wrist joint Arthroscopy
- State-of-the-art hand and wrist-joint Implants

Volunteer Work

Patients around the world benefit from the expertise and experience of Professor Dr. Nikolaus Wachter, Medical Director of the Division. Within the framework of the „Opération Sourire Cambodge“ sponsored by the relief organization „Médicines du Monde“, Professor Dr. Wachter travels regularly to Cambodia and other parts of the world as part of an international team. In this capacity he operates free of charge on patients, in particular children, suffering from the sequelae of serious burns and hand injuries.
